| AI Content & Video Generation    | Website Dev (Astro/Cloudflare) | Decision Strategy & Rules Design |
| Procurement & GRN Process Design | Stakeholder Communication      | Cross-Functional Collaboration   |

## PROFESSIONAL EXPERIENCE

### Founder | Dr. Psy — AI-Native Mental Health Education Platform

Mar 2026 – Present, Remote

**Content & Growth Strategy:** Founded and operated an AI-native psychiatric education brand end-to-end — content strategy, video production, website, and analytics — run through a fully AI-assisted pipeline in place of a traditional production team.

- Directed **AI-driven video and image generation** (character-consistent AI mascot, ChatGPT/FLUX-based pipelines) to produce short-form Instagram and YouTube content at near-zero production cost.
- Analyzed Instagram performance data to identify winning content patterns; two flagship reels generated **34,560** and **34,198 views**, driving **886** and **1,059 new followers** respectively — together accounting for **97% of all account follower growth** — and used the findings to redirect ongoing content strategy.

**Website & Funnel Strategy:** Owned end-to-end delivery of the brand website (**drpsyai.com**), designing the site architecture, lead funnel, and booking flow.

- Built condition-education pages, three validated clinical self-assessments (**GAD-7, ASRS-v1.1, PHQ-8**), and a booking flow, implementing a “Content → Trust → Assessment → Consultation” lead funnel.
- Integrated an AI chatbot and inquiry-capture flow to convert content viewers into consultation leads.

### Freelance Growth & Systems Consultant | Strengthiva (Ayurveda D2C)

Apr 2026 – Present, Remote

**Content & Growth Strategy:** Engaged as a freelance consultant to drive content design, AI video generation, and social media growth for an Ayurveda D2C brand's digital presence.

- Produced AI-generated video and image content and managed social media strategy across Instagram and Facebook, applying content-performance analysis (format, length, posting cadence) to guide the content roadmap.
- Designed and drove **lead-generation strategy** for the brand's assessment-led sales funnel.

**Operations & Personalization Strategy:** Designed operational and product-decision strategy supporting the brand's supply chain and online assessment engine.

- Designed a **Procurement Tool** and **GRN (Goods Receipt Note)** workflow strategy to streamline supplier ordering and inventory-receipt reconciliation.
- Defined the **personalization strategy** behind the brand's online assessment engine — mapping **144 customer profile combinations** (condition, BMI, gender) to tailored diet plans and product recommendations to maximize relevance and conversion of the assessment-to-purchase funnel.
- Identified and flagged a **critical data-mapping defect** in the live assessment questionnaire that was silently mis-routing customer responses to incorrect product recommendations, protecting recommendation accuracy going forward.

### Senior Cataloger | Project Manager (Zeproc, Norway)

Feb 2025 – Dec 2025, Remote

**Project Delivery & Roadmap Management:** Owned end-to-end project execution for the product data platform supporting **200,000+ SKUs**; translated supplier and leadership requirements into prioritized technical deliverables, managed timelines, and ensured on-time, in-scope releases.

- Used **Trello** to assign tasks, track deadlines, and coordinate cross-functional projects (new partner onboarding, SKU improvements, product additions/removals)
- Identified risks early, facilitated alignment between catalog, tech, and marketing teams, and drove scope/timeline adherence

**Stakeholder & Supplier Requirements:** Acted as primary interface for global suppliers; gathered functional requirements, clarified needs, and managed expectations on data, pricing, and compliance.

- Conducted regular supplier interviews to collect product data, pricing details, discounts, and new arrivals; resolved discrepancies to meet platform standards
- Collaborated with marketing on high-performing SKUs to define seasonal strategies (additional discounts, content enhancements)

**Process Improvement & Cross-Functional Collaboration:** Bridged catalog and tech teams to address challenges. Designed workflows in **Miro** for complex cases and automated processes to reduce errors.

- Built locked Google Sheets and validation scripts to minimize manual mistakes and improve efficiency.
- Reduced incomplete records from **28% to <2%**; performed SEO audits and ensured Google Merchant Center compliance, **increasing organic impressions by 60%**.

### Senior ORM Executive (Swiggy)

*Feb 2019 – Feb 2025, Bangalore*

**ORM & Customer Engagement:** Led online reputation management and real-time customer interactions across Instagram, X, Facebook, LinkedIn, Quora, and review sites for India's largest food-delivery brand.

- Monitored **10,000+ weekly brand mentions** in **Sprinklr**, responded promptly to inquiries/escalations, and fostered positive community engagement to maintain high **CSAT scores**.

**Campaign Collaboration & Influencer Management:** Partnered with the marketing team and influencers on campaign execution. Monitored user-generated content, reviews, and sentiment to optimize ongoing promotions.

- Collaborated with influencers and marketing stakeholders to align ORM responses with campaign goals, amplify positive mentions, and mitigate risks during launches.
- Tracked campaign performance through customer reviews, feedback trends, and social sentiment; generated post-campaign reports highlighting key insights and recommendations for future strategies.

**Process Optimization & Automation:** Identified inefficiencies and drove data-backed improvements to streamline ORM workflows and team performance.

**Team Leadership & Quality Assurance:** Mentored and supported ORM specialists; conducted quality audits and provided ongoing coaching to ensure SLA adherence and service excellence.

### Senior Associate – Operations (Expedia | Aegis)

*Apr 2018 – Jan 2019, Bangalore*

**Operations:** Delivered end-to-end support for North American customers on flights, hotels, car rentals, and activities bookings using **SABRE and AMADEUS GDS platforms**.

**Vendor & Partner Coordination:** Acted as liaison between customers and global travel partners to resolve disruptions and secure alternatives.

- Collaborated directly with airlines, hotels, car-rental agencies, and GDS vendors to negotiate availability, rebook options, and special requests.

### Technical Support Executive (Wipro)

*Aug 2014 – Feb 2017, Kolkata*

**Technical Support & Troubleshooting:** Provided **Level 1 & 2 support** for broadband internet, landline telephony, and YouView TV services to UK residential and small-business customers.

**Process Documentation & Root-Cause Analysis:** Analysed ticketing data and outage patterns to support long-term resolutions.

- Collaborated with engineering teams on complex network issues and documented findings for knowledge base improvements

## ACHIEVEMENTS

**Competitive Chess Player:** Represented school at the national level. Gold Medalist at Inter-Symbiosis College Tournament.
